Authorization for this examiner's amendment was given in a telephone interview with Carl Brundidge (Reg. No. 29,621) on June 13, 2006.

The application has been amended as follows:

In Claims 1, 8, and 15, on lines 29, 24, and 33, respectively, replace "operations on the data by using the first protocol" with --operations on the data **in the second storage system** by using the first protocol--.

In Claim 8, line 16, replace "apparatuses a first protocol" with --apparatuses **convert** a first protocol--.

### ***Drawings***

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: a formal drawing of Figure 5 is required. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

### ***Allowable Subject Matter***

3. Claims 1-15 are allowed.

Art Unit: 2112

4. The following is a statement of reasons for the indication of allowable subject matter:

as to all of the independent claims, the prior art of record does not teach a system where in one situation a host computer is connected to a switch apparatus and the switch apparatus sets a relationship between a first identifier of a first storage system and a second identifier of a second storage system and a further situation where the host computer performs read and write operations on data in the second storage system by using a first protocol and the first identifier and the switch apparatus controls converting the first protocol to a second protocol to perform read and write operations on data of the second storage system, when the switch apparatus transfers data from the first storage system to the second storage system, wherein the system changes between the situations as needed.
